PROFESSIONAL SUMMARY

Front-End Developer and final-year B.E. Computer Engineering student with hands-on internship experience building responsive, production-grade Single Page Applications using React.js, JavaScript (ES6+), Redux Toolkit, and Tailwind CSS. Skilled in component-based architecture, state management, REST API integration, Firebase authentication/database implementation, and leveraging AI developer tools to streamline frontend workflows and ship maintainable, high-performance UIs. Deployed a live e-commerce platform (FoodRush) demonstrating end-to-end ownership from UI design to production deployment, with strong Git/GitHub workflow discipline.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Redux Toolkit, React Router, Context API, Framer Motion, Tailwind CSS

Backend & Database: Firebase (Authentication, Firestore, Real-Time Sync), REST API Integration, Axios

Tools & Build Systems: Git, GitHub, Vite, Webpack, NPM, ESLint, Prettier, VS Code, Chrome DevTools

Core Competencies: Component-Based Architecture, State Management, Responsive Web Design, Cross-Browser Compatibility, Form Validation, UI Animation, Single Page Applications (SPA), Agile Collaboration

WORK EXPERIENCE

Front-End Developer Intern | Maxgen Technologies Pvt. Ltd.

Jan 2026 - Apr 2026

- Built responsive, production-ready web pages using semantic HTML5, CSS3, and modular JavaScript under professional mentorship, following clean coding and scalable engineering standards.
- Developed custom front-end UI components and optimized interface styling using Tailwind CSS to improve layout consistency and load performance.
- Debugged and resolved rendering issues and asynchronous data-state bugs to improve application stability and user experience.
- Managed version control and collaborative codebase workflows using Git and GitHub, including branching and deployment tracking.

React.js Developer Intern | InfoLabz IT Services Pvt. Ltd.

7th Semester

- Learned and applied core React.js concepts including component architecture, props, and state management to build functional UI modules.
- Integrated live REST APIs using JavaScript/Axios to fetch and render dynamic data on the front end.
- Structured and displayed fetched API data in a clean, organized, and user-friendly format across application views.

KEY PROJECTS

FoodRush - Online Food Ordering Platform

React.js, Redux Toolkit, TypeScript, Tailwind CSS, Framer Motion, Firebase

- Architected a fully responsive Single Page Application with a modular, reusable component hierarchy for fast client-side rendering.
- Implemented Redux Toolkit for global state management and integrated Firebase Firestore as the backend to handle dynamic menus, order processing, and real-time shopping cart calculations.
- Configured Firebase Authentication for secure sign-up/login and combined it with browser Local Storage persistence to maintain cart and session state across visits.
- Designed high-quality UI interactions and animations (hover states, page/layout transitions) using Framer Motion to enhance user engagement.
- Deployed and maintained the application in production on Vercel, ensuring cross-device responsiveness and stable live performance.

EDUCATION

B.E. in Computer Engineering

2022 - 2026

Ahmedabad Institute of Technology, Ahmedabad (Affiliated with GTU) | CGPA: 7.84

Higher Secondary Education (Std. 12, GSEB)

School of Science, Rajkot | 80.32 Percentile

Secondary Education (Std. 10, CBSE)

Shree Laxminarayan Vidya Pratishthan, Deshpur | 80.60%

LANGUAGES: English, Hindi, Gujarati
